

DRAWINGDESK
BY APPVEDA LABS

AEC PDF Viewer and Markup Tool for Windows

Review demanding technical drawings, add precise feedback and export commented PDFs from a focused drawing-first workspace.

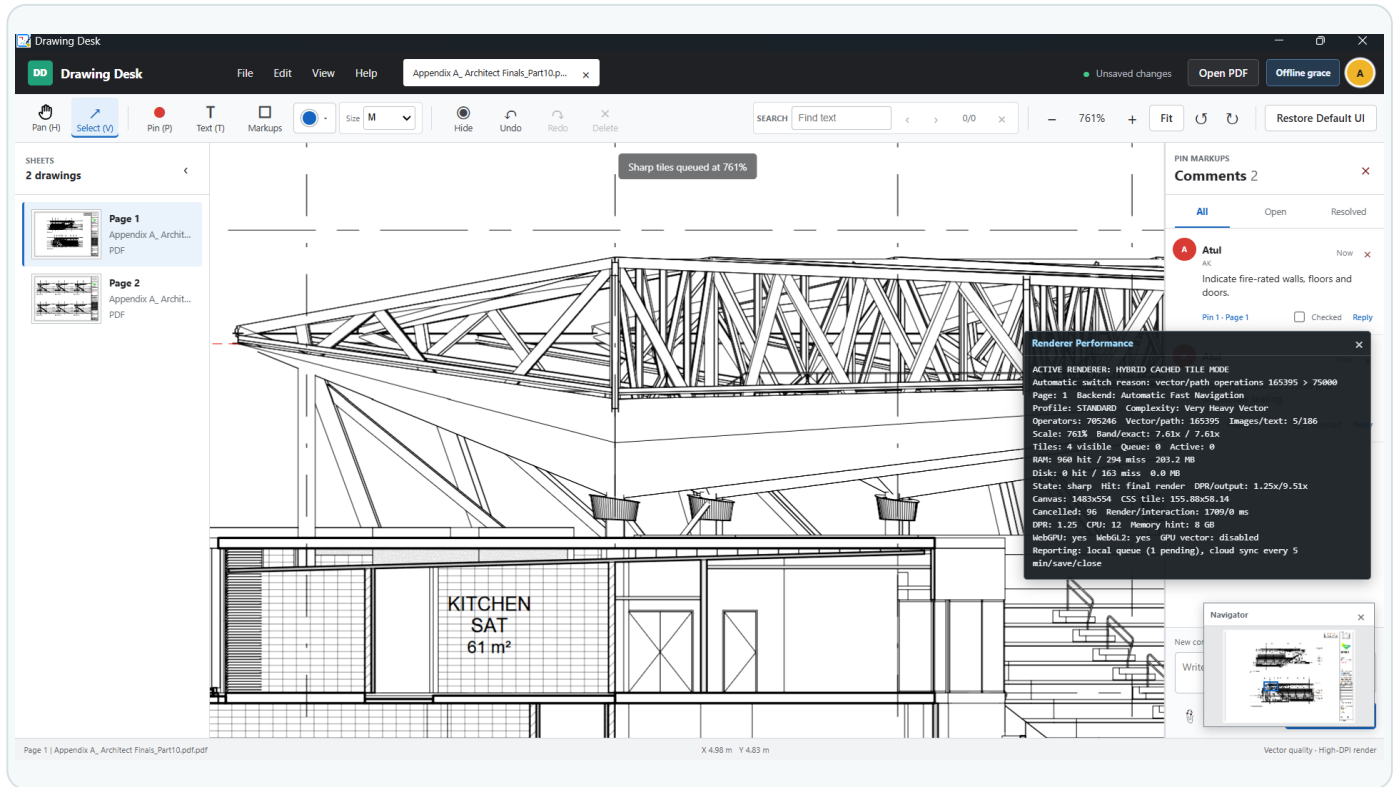

ACTUAL DRAWINGDESK APPLICATION VIEW

Complete review environment with technical drawing navigation, visual markups, sheet thumbnails, numbered issues, comments and the movable Navigator.

START 15-DAY TRIAL

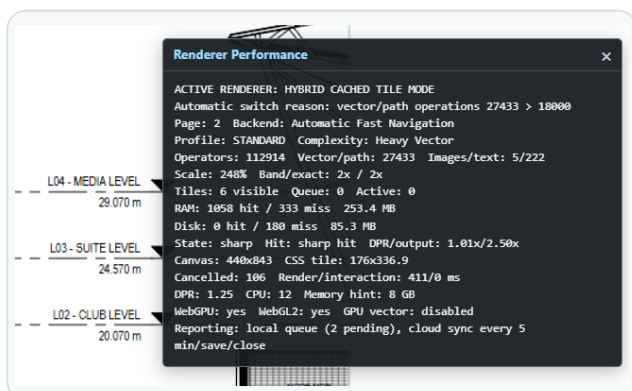

Built for demanding drawings.

DrawingDesk evaluates the drawing, adapts the viewing approach and makes performance behaviour visible through optional Advanced Diagnostics.

ACTUAL HIGH-ZOOM APPLICATION VIEW

A demanding technical drawing with Navigator, comments and Advanced Diagnostics visible. The visible drawing area receives priority while clearer settled detail is prepared.

CUSTOMER BENEFITS

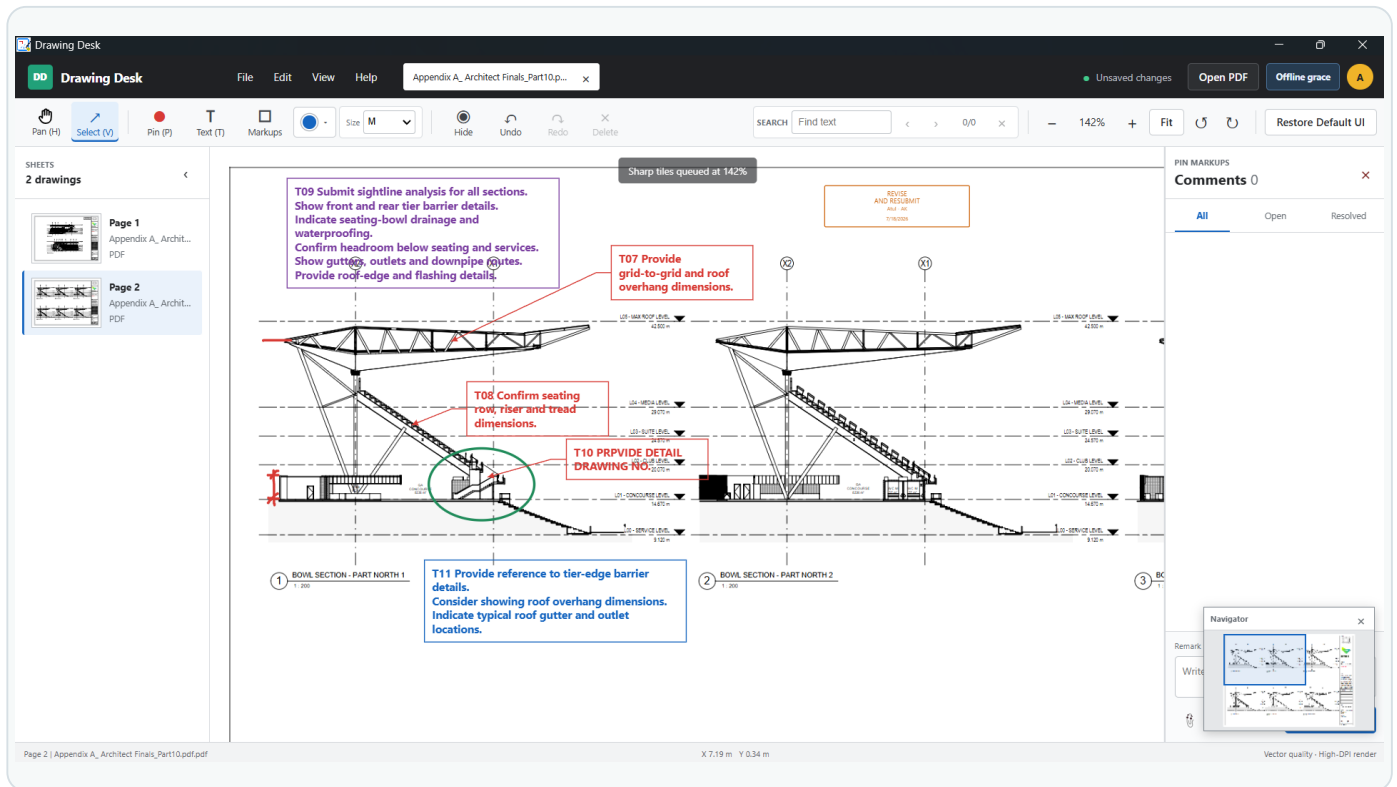

- Adapts viewing behaviour to the drawing and the computer.
- Helps keep drawing context visible during movement where possible.
- Prepares a clearer view after movement settles.
- Can reuse locally optimised drawing areas on later visits.
- Keeps Advanced Diagnostics optional during normal work.

Performance information you can verify

Active viewing status, current zoom and measured troubleshooting information remain available when needed.

Keep the full drawing in context.

Use colour-coded leaders, shapes and stamps while the Sheets panel and Navigator help maintain orientation across a large technical sheet.

ACTUAL DRAWING-WIDE REVIEW

Wide architectural drawing review using coloured leader notes, shapes, a review stamp, sheet thumbnails and the Navigator.

Precise direction

Connect each observation to the exact drawing location with leaders, shapes and clear review text.

Readable context

Keep drawing content legible while visual feedback remains easy to find and understand.

Review status

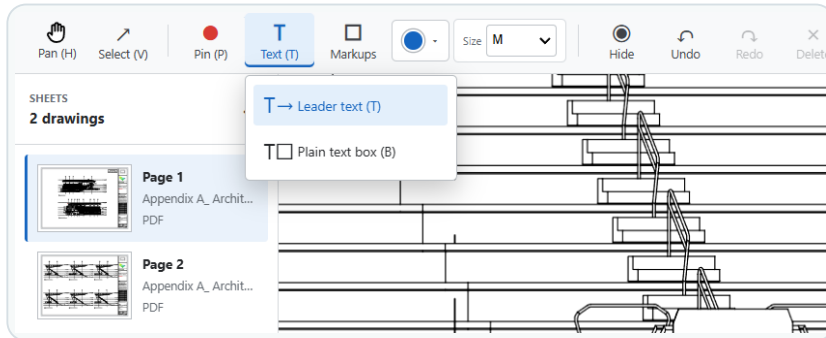

Use stamps and colour conventions to communicate required action and coordination state.

Spatial orientation

Move between Sheets and use Navigator to return to the detail being reviewed.

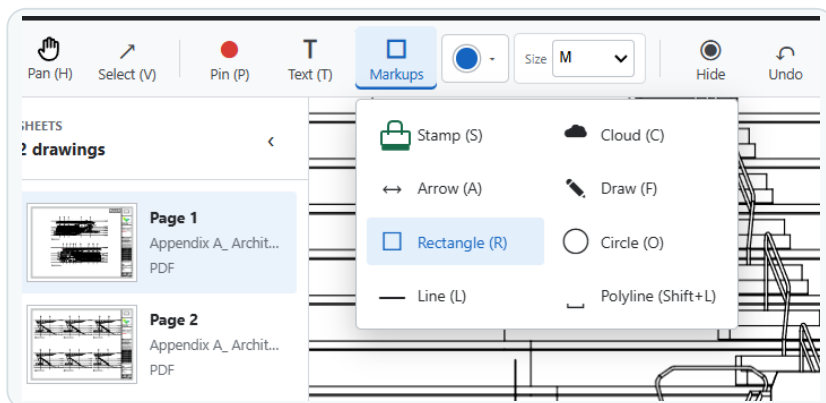

Choose the clearest review language.

Text, shapes and drawing-linked comments support different kinds of feedback without covering important technical content.

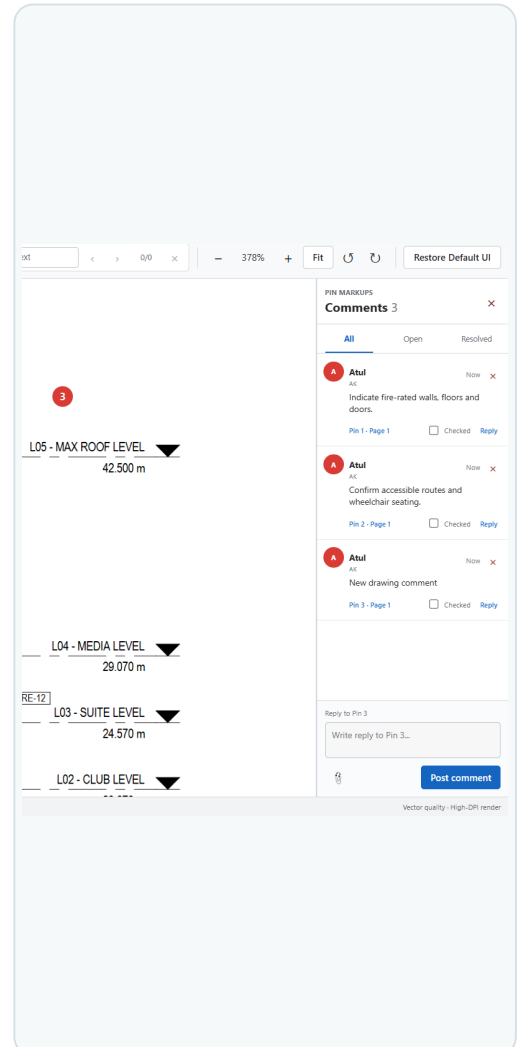

TEXT MARKUP

Leader Text points directly to a detail. Plain Text Box adds a concise note without a leader. Keyboard shortcuts support repeat review work.

SHAPES AND REDLINES

Use review stamps, revision clouds, arrows, freehand drawing, rectangles, circles, lines and polylines to communicate each issue clearly.

PIN COMMENTS

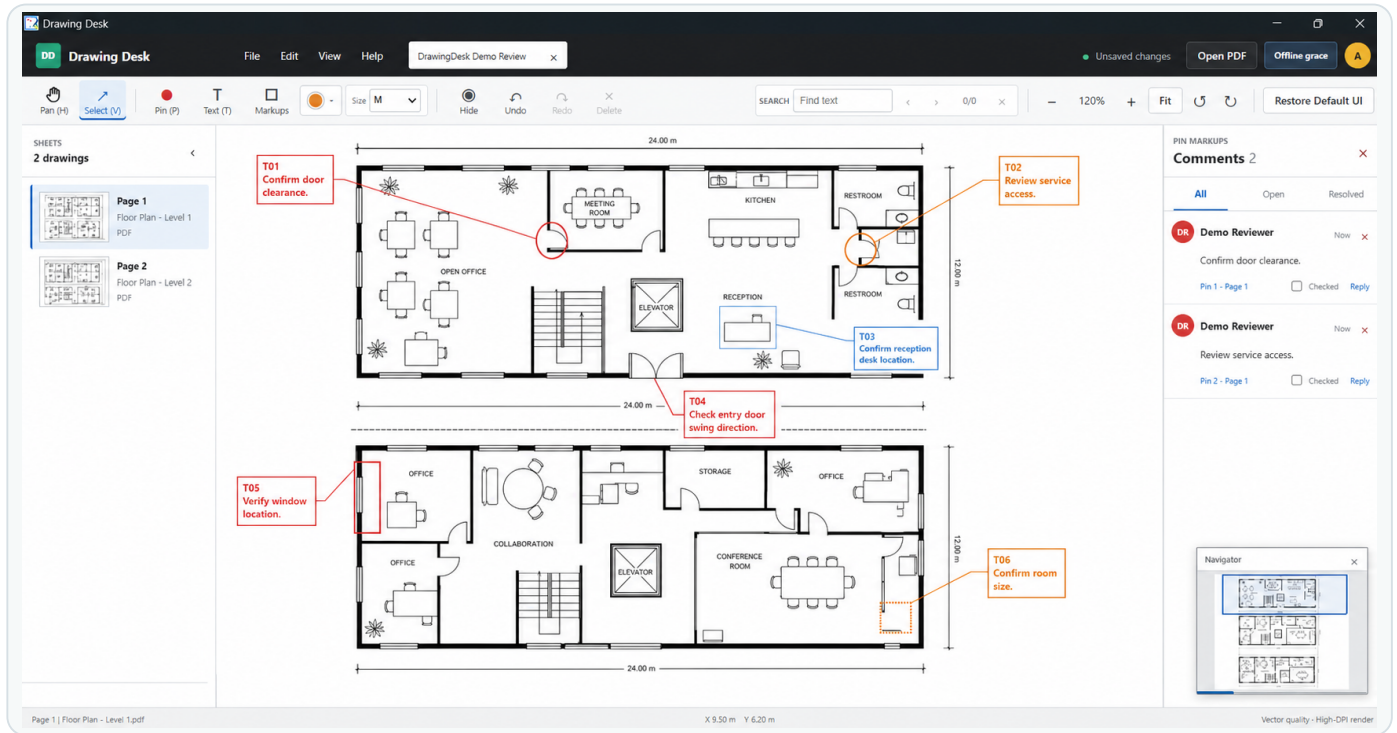

Numbered drawing pins keep the location visible while comments, replies, checked state and open or resolved filters remain organised in the Comments panel.

A TOOL FOR EACH KIND OF FEEDBACK

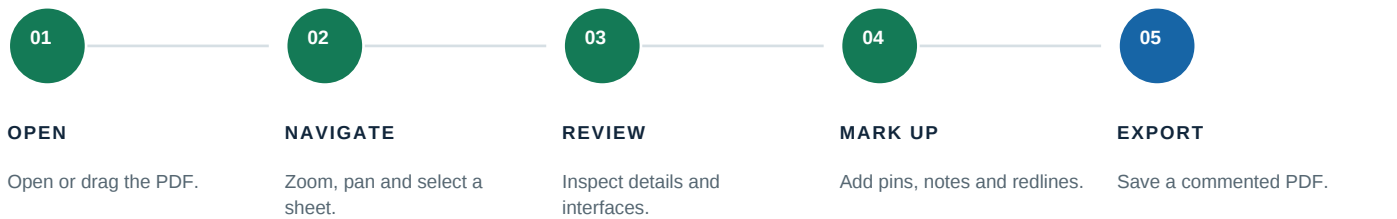

Use pins for discussion, text for clear instructions and visual redlines for immediate drawing direction.

From open drawing to reviewed output.

This additional DrawingDesk demonstration view shows a typical floor-plan review through one focused workspace.

Typical floor-plan review with coloured notes, comments, sheet thumbnails and Navigator.

DRAWING-FIRST WORKFLOW

The drawing stays at the centre. Review tools remain close without taking over the screen, and the source PDF is not silently overwritten.

Start with your own drawings.

One DrawingDesk application supports permanent Free Viewer, Trial, Student and paid access. Activate another mode later without reinstalling.

15-day trial

No payment required. Install DrawingDesk, sign in and start an eligible trial on one Windows device.

Individual Licence - INR 1,499

One user and one active Windows device for 12 months.

Office / Group Licence - INR 9,999

Ten assignable seats for 12 months. A released seat can be reassigned after the 24-hour interval.

DELIVERY CHOICES

Windows Installer

Recommended for regular use with normal Start menu, desktop and uninstall integration.

Portable Version

Extract to a writable folder and run without normal installation or file-association changes.

Student Edition - Free for 12 months

Institutional email required. One student, one device, educational use only, export notice and annual re-verification.

PURCHASE, ENTERPRISE AND LICENSING SUPPORT

Current purchase availability is shown on the pricing page. Enterprise licensing is available through a custom discussion.
